

Project Design Phase-III

Solution Architecture

Date	28-09-2026
Team ID	SWTID-2026-8620
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions.

For our project "Import Data using Transform Maps", it defines how spreadsheet data is imported into ServiceNow target tables. Its goals are to:

- Find the best tech solution to import bulk data from spreadsheets without manual entry.
- Describe the structure, characteristics, behavior of Data Source, Import Set Table, and Transform Map.
- Define features, development phases, and solution requirements for data transformation.
- Provide specifications according to which the solution is defined, managed, and delivered.
